

Code

A list of all our public resources can be found on code.hampel-soft.com

Please make sure to look at [our coding conventions](#) and [our way of working](#) if you're planning on using or even extending our source codes. You'll get a better understanding of why things look the way they do.

This section of our Dokuwiki aims to provide documentation for our public offerings:

Common

Gives information on how we structure our repositories and our LabVIEW projects.

⇒ [Common](#)

Open Source

Internal reuse libraries and generic drivers/tools.

⇒ [Open-Source](#)

HSE DQMH

Contains information on the modules and frameworks that we built on top of the DQMH framework. Also describes our own DQMH flavour (i.e. the features we added).

⇒ [HSE DQMH](#)

HSE Labs

Showcases things that we play around with; helper tools and similar useful, but unstructured chunks of code.

⇒ [HSE Labs](#)

Commercial

These tools and modules can help you save time as you don't have to develop them from scratch. We think it's fair to participate in your benefit.

⇒ **Commercial**
