

Code

A list of all our public open-source projects can be found on opensource.hampel-soft.com

Please make sure to look at [our coding conventions](#) and [our way of working](#) if you're planning on using or even extending our source codes. You'll get a better understanding of why things look the way they do.

This section of our Dokuwiki aims to provide documentation for our public offerings:

Common

Information on how we structure our repositories and our LabVIEW projects.

⇒ [Common](#)

Open Source

Open-sourced internal reuse libraries and generic drivers/tools.

⇒ [Open-Source](#)

HSE DQMH

Open-sourced modules and frameworks that we built on top of the DQMH framework.

Also describes our own DQMH flavour (i.e. the features we added).

⇒ [HSE DQMH](#)

HSE Labs

Open-sourced things that we play around with; helper tools and similar useful, but unstructured chunks of code.

⇒ [HSE Labs](#)

Commercial

Libraries and modules that implement specific feature sets for business-relevant use cases.
These tools are not open-sourced.

⇒ **Commercial Offerings**

Please contact us at office@hampel-soft.com if you're interested in commercial support.
