

# Project Provider

The LabVIEW Project Provider Framework is a set of advanced APIs that allow you to control and modify the LabVIEW Project window. With it you can do things like add new items to the project window, modify existing items, add extra right-click menu options, add glyphs to the icons, add extra toolbars, etc.

## Paths

- Up to LV 2010: <LabVIEW>\resource\Framework\Providers
- LV 2011 and later: <LabVIEW>\resource\Framework\Providers\GProviders (.ini files only)
