

05 Collaboration

Information on how to collaborate on our public source code offerings in alignment with our way of working: How to consume them, how to modify them, and how to integrate your changes back into our codebase.

Get git up and running

- [optional] create an account at gitlab.com. This allows us to grant write access to repositories, so you can use the [gitflow workflow](#) instead of the [project forking workflow](#).
- [install and setup git](#)

Get familiar with our way of working

- [Coding Conventions](#)
- [Source Code Control - Rules & Guides](#)
- [Workflow Model](#)

Get familiar with our existing code

- pull the [hse-application-template](#) from gitlab.com
- read the documentation
 - [Code: Common](#)
 - [Code: Application Template](#)

Get going and contribute

- Read up on the Project Forking workflow
- Fork the repo
- Implement your changes using Gitflow
- Finish and push your features
- Create a Merge Request
