

05 Collaboration

Information on how to collaborate on our offerings in alignment with our way of working: How to consume them, how to modify them, and how to integrate your changes back into our codebase.

Get git up and running

- [install and setup git](#)

Get familiar with our way of working

- [Coding Conventions](#)
- [Source Code Control - Rules & Guides](#)
- [Workflow Model](#)

Get familiar with our existing code

- pull the [hse-application-template](#) from gitlab.com
- read the documentation
 - [Code: Common](#)
 - [Code: Application Template](#)

Get to work

- Browse the issues list - for example [here](#) - if you don't have a specific feature in mind. If you already know what you want to add, create an issue for your new feature first!

For Open-Source Projects

- Read up on the [project forking workflow](#)
- Fork the repo
- Implement your changes using Gitflow
- Finish and push your features
- Create a Merge Request

For Customer Projects

- Create an account at [gitlab.com](#). This allows us to grant write access to repositories, so you can use the [gitflow workflow](#)
- Clone the repo
- Implement your changes using Gitflow
- Finish and push your features
